

ARPE's business policy is an essential corporate element which integrates and inspires commitment to meet interested parties needs through responsible management from the three-pronged area of Social Responsibility: the economic, environmental and social.

The Management therefore believes that it is necessary to present its principles of action in the form of an Integrated Policy (quality, environment and social) to guide and inspire the company's actions as well as to reveal the organisation's public commitment to all the interest groups.

In order to assure the high quality of our products and services, to protect the environment and promote social values, ARPE agrees to introduce the Environmental and Quality Integrated Management System based on the **UNE-EN-ISO-14001** and **UNE-EN-ISO-9001** standards.

To put these principles into practice, the ARPE Management agrees:

- > That the purpose of the company's activities is to satisfy the interested parties with products and services of the highest possible quality.
- > To assure materials supply from the framework of Social Responsibility and guaranteeing their quality.
- > To consolidate the company and its workplaces in order to provide stability to all ARPE staff.
- > To train, prepare and sensitise staff to successfully take on the policy, mission and vision of the company.
- > To seek innovation and on-going improvement as a reply to the interested parties needs, the protection of the environment and prevention of pollution.
- > To disseminate this policy on all levels of the organisation, interested parties, suppliers and other interest groups.
- > To take the necessary measures to meet the legal requirements applicable to the activities developed, as well as all of the requirements of the implemented Management System.
- > To define and periodically revise the goals established in meeting this policy, within the framework of the process of on-going improvement of the organisation's actions.
- > To continuously improve the effectiveness of the Quality and Environment Integrated Management System, while considering the social aspects brought into the company.

Arenys de Munt, 5th of April 2018.
